

VANGA YAMUNA

Security Analyst · VAPT Specialist · Penetration Tester

+91 9398769288 • yamgoud123@gmail.com • linkedin.com/in/yamuna-goud-1801031a0 • Hyderabad, India

PROFESSIONAL SUMMARY

Analyst with 5 years of experience in web, network, and infrastructure security testing. Strong foundation in vulnerability assessment, risk analysis, and remediation using OWASP, PTES, and CVSS. Passionate about offensive security and actively transitioning into Penetration Testing, with proven skills in Burp Suite, Metasploit, Python automation, and client advisory.

CORE COMPETENCIES

Penetration Testing: Web Application Pentesting, Network Penetration Testing, Red Teaming, Exploit Development

Vulnerability Management: Vulnerability Assessment, Malware Analysis, Threat Intelligence, OSINT, SIEM Monitoring

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK, Cyber Kill Chain, PTES, NIST

Tools: Burp Suite Pro, Nessus Pro, Metasploit, Kali Linux, Parrot OS, Nmap, Wireshark, SQLMap, HCL AppScan, Gobuster, Nikto, Remnux, FlareVM, Tcpdump

Programming & Scripting: Python (tool dev, automation), Bash scripting, SQL

Reporting: Risk Advisories, CVSS-scored Vulnerability Reports, Executive Security Briefings

KEY PROJECTS

Malware Analysis Lab — Designed and deployed an isolated sandbox environment (Remnux + FlareVM) to analyze 50+ malware samples including ransomware, trojans, and stealers; improved threat detection accuracy by 30% through behavioral and static analysis.

Business Logic Vulnerability Scanner — Engineered an automated Python-based scanner targeting business logic flaws in web applications; reduced manual testing time by 50% and enabled consistent, repeatable assessments across client engagements.

Network Simulation Attack Framework — Developed a controlled Python simulation framework covering SYN flood and DNS amplification DoS/DDoS vectors for internal red team exercises, enabling safe stress-testing of network defenses.

Endpoint Fuzzing Tool — Built a custom Python tool leveraging TCP socket connections to fuzz and enumerate hidden API endpoints, surfacing undocumented attack surfaces for inclusion in client security assessments.

ACHIEVEMENTS & RECOGNITION

- TryHackMe Global Rank #13,000 — Top 1% worldwide, demonstrating consistent proficiency across offensive and defensive cybersecurity challenges.
- Completed Advent of Cyber 2024 & 2025 — intensive month-long challenge series covering a broad range of offensive and defensive security domains.
- Contributed to measurable improvements in client assessment quality through adoption of advanced techniques in collaboration with senior security engineers at HCL Technologies.

CERTIFICATIONS & TRAINING

- CEH v10 – Certified Ethical Hacker Course Completion Certificate, Supraja Technologies
- Certified Cyber Security Professional – Berry9 IT Services Private Ltd.
- Deloitte Australia Cyber Job Simulation (Forage) – Investigated a simulated enterprise cybersecurity breach scenario
- Junior Penetration Tester – TryHackMe
- Red Teaming – TryHackMe
- Web Application Red Teaming – TryHackMe
- Web Application Pentesting – TryHackMe
- Cyber Security 101 – TryHackMe
- Web Fundamentals – TryHackMe
- Introduction to Cyber Security & Pre-Security – TryHackMe

PROFESSIONAL EXPERIENCE

Analyst | HCL Technologies

September 2021 – Present

EDUCATION

B.Tech in Information Technology

Vidya Jyothi Institute of Technology, Hyderabad
